| <b>Compulsory</b> REVISION comments | <ol style="list-style-type: none"> <li>1. The topic is better to be reframed as "ASSOCIATION BETWEEN ABO AND RHESUS BLOOD GROUPS WITH TYPE II DIABETES MELLITUS AMONG THE URHOBOS"</li> <li>2. Reframe the background under the abstract without starting with the history</li> <li>3. Under the abstract, you said 410 subjects were randomly sourced within... Use recruited instead of sourced</li> <li>4. P-Value&gt;0.05 is considered as significant? How? Or you mean <math>p &lt; 0.05</math>?</li> <li>5. Under the introduction, there is no need to have aim of the study as sub-title. Kindly reframe it into a sentence</li> <li>6. Methodology? Change it to Materials and Methods</li> <li>7. Under your study design, indicate the type of study it is.</li> <li>8. Under Selection criteria, you only mentioned exclusion criteria. How about inclusion criteria?</li> <li>9. Your conclusion did not answer your research question or hypothesis. Kindly conclude based on that</li> <li>10. The author should strictly follow template standard of this journal with arrangement of the list references and also presentation of reference number as [1,2] within the manuscript</li> </ol> <p><b>Ethical issue:</b></p> <p>Yes, but it was not addressed. Also ethical registration number should be supplied with revised copy</p> |                                                                                                                                                                               |
| <b>Minor</b> REVISION comments      | <ol style="list-style-type: none"> <li>1. Analytical approach? Or Statistical Analysis? Also, reframe your statistical analysis write up to indicate clearly type of tools used</li> <li>2. Under the results, write briefly on interpretation of each table before moving to discussion</li> <li>3. Under your discussion, you said this study was compared with Ladoke Akintola University. How? Kindly quote the owner of the work as your reference</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                               |
| <b>Optional/General</b> comments    | <p>Even though a lot of work had been on this area yet the work is still okay and the findings are worth-sharing with the scientific community provided the author could revise the manuscript appropriately.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                               |
