#### **SDI Review Form 1.6**

Journal Name:	Advances in Research
Manuscript Number:	2014_AIR_14405
Title of the Manuscript:	Effect of Acetylation on the Physical and Functional Properties of Industrial and Laboratory Cassava (Manihot esculenta) Starches
Type of the Article	Original Research Article

### **General guideline for Peer Review process:**

This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of '<u>lack of Novelty'</u>, provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

# **SDI Review Form 1.6**

# **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper deals with the physical and functional properties of acetylated cassava starch. It is interesting. The data is solid and the analysis is detailed. I would like to recommend publish this manuscript after minor revision.  (1)Page 3 line 70 to 83, the experimental methods (bulk density, sedimentation volume, water or oil absorption capacity, viscosity, swelling power and solubility) should be more detailed.  (2)Figure 2,4A, 4B and 6 are complicated, it is better use tables.  (3)The discussion part is too short, and the authors concluded their results were similar to the previous reports, Hence, they should carefully analyze their results and show originality.	
Minor REVISION comments		
Optional/General comments
