

### **Editors Comments:**

Organization of references introduction /overview is improved for scientific purpose. Authors should rewrite introduction part again explaining each reference in detail.

1 Language of whole paper is revised of scientific way. I strongly recommend the authors to change the

title of the paper (e.g. **computational approach for the solution of some Electric circuit problems**).

2. Quality of graphs/ figures is good still authors are required to improve results and

Conclusions and add some text of section 4.

3 . Numerical solution of the paper is not specified and what is used of software to solve the system of equations.

4 . The paper is of interest with the application point of view .The paper is suitable after correction and then this paper is recommended for publication.
