

**Editor's Comment:**

The manuscript is interesting and well written, and for this reason should be finally accepted for publication. However, I would like to recommend the correction of some "minor issues" that are highlighted within the document by using the track changes mode in MS Word. You have only to accept or reject my suggestions throughout the text, but I am really convinced that the suggested changes would really improve your manuscript and the quality of its presentation. I have also suggested the removal of the "Figure 1", since information present in it was already presented throughout the text.

The main problems I have found are related to the references, since many of them are not in accordance to the journal recommendations. Please, consult the "General Guideline for Authors" to follow the format requested by AIR.

I would like to thank you for both your patience, and for submitting your manuscript to Advances in Research.
