

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_21988
Previous title of the Manuscript:	FAST SCREENING METHOD FOR LYSINE-PRODUCING YEASTS
New title of the Manuscript:	FAST SCREENING METHOD FOR DETECTING LYSINE-PRODUCING YEASTS
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Statistical analysis is a MUST whether the work is preliminary or not. Otherwise reader cannot judge the significant of the findings. Provided the author willing to include more data to the manuscript.	The purpose of the study is not exactly quantitative but a preliminary study to show that yeast cells can produce lysine and provide a fast procedure to identify it. Statistical analysis would be presented in subsequent papers for publications which deal more on yields of lysine.
