

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_21988
Previous title of the Manuscript:	FAST SCREENING METHOD FOR LYSINE-PRODUCING YEASTS
New title of the Manuscript:	FAST SCREENING METHOD FOR DETECTING LYSINE-PRODUCING YEASTS
Type of the Article	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>As previously said, the manuscript presents excellent contribution to research with yeasts of industrial interest. However, some consideration are important, related to the my previous review.</p> <p>I have not found the phrase "the suspension was submitted to rest before dilution ..." cited by the authors (SDI Review Form 1.6 and Final Eval form).</p> <p>Corrections in the "references" were executed but I suggest a new revision of the same. For example, in references 5, 8 and 13 (lack some authors). In the references 8 and 13, the names are "Pferrere" or "Pfeffere"?, "Screenivasan" or "Sreenivasan"?). The word is "fermentation" in the reference 13.</p> <p>The authors cite fruits samples but do not report the specific fruits and isolated yeasts - I consider this information important. This research is not about fruit and yeast, but this information is enlightening. I know ecology of yeasts, but was just a suggestion to enrich the manuscript. Therefore is not necessary, if the authors do not consider important. In the other items previously questioned, there are no more problems.</p>	<p><b>All suggestions and corrections are noted and have been taken care of. However, we did not go to identify yeasts and the fruits they were isolated from. We only took note of the fruits from where the lysine producing yeasts were isolated. References 5,8,112,13 have been corrected. Thank you.</b></p>
