

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_21988
Previous title of the Manuscript:	FAST SCREENING METHOD FOR LYSINE-PRODUCING YEASTS
New title of the Manuscript:	FAST SCREENING METHOD FOR DETECTING LYSINE-PRODUCING YEASTS
Type of the Article	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>As previously said, the manuscript presents excellent contribution to research with yeasts of industrial interest. However, some consideration are important, related to the my previous review.</p> <p>I have not found the phrase " the suspension was submitted to rest before dilution ..." cited by the authors (SDI Review Form 1.6 and Final Eval form).</p> <p>Corrections in the "references" were executed but I suggest a new revision of the same. For example, in references 5, 8 and 13 (lack some authors). In the references 8 and 13, the names are "Pferrere" or "Pfeffere"?, "Screenivasan" or "Sreenivasan"?). The word is "fermentation" in the reference 13.</p> <p>The authors cite fruits samples but do not report the specific fruits and isolated yeasts - I consider this information important. This research is not about fruit and yeast, but this information is enlightening. I know ecology of yeasts, but was just a suggestion to enrich the manuscript. Therefore is not necessary, if the authors do not consider important. In the other items previously questioned, there are no more problems.</p>	

**Reviewer Details:**

Name:	Francisco De A. Baroni
Department, University & Country	Department of Veterinary Microbiology and Immunology, Rural Federal University, Brazil
