FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>✓ Statistical analysis is a MUST whether the work is preliminary or not. Otherwise reader cannot judge the significant of the findings. Without statistical analysis, how the author decide which isolate to choose to proceed the work?</p> <p>✓ In my view, this manuscript has extremely little contribution to be considered as a scientific article and the author have done very little or very preliminary work in his/her research. The manuscript should be rejected since the author not willing to include more data and rewrite most of the manuscript.</p>
