

**SDI Review Form 1.6**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_30352
Title of the Manuscript:	REPAIR AND STRENGTHENING OF R.C FLAT SLAB CONNECTION WITH EDGE COLUMNS AGAINST PUNCHING SHEAR
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	<p>1. The introduction does not bridge the gap properly between the state of the art and the work done.</p> <p>2. The experimental investigation have to add some images of strengthening by FRP.</p> <p>3. The conclusions are too obvious and focus should be given on the original findings.</p> <p>4. The references are not up to date and does not present the state of the art.</p> <p>Please clarify this: This manuscript very interesting in the structural engineering point of view. The flat slab connection repair very severe issue now.</p>	
<b><u>Optional/General</u></b> comments
