

Editor's Comment:

The Manuscript number Ms_AIR_34246 has two significant lacks:

1. Reviewers have written excellent comments, but the author(s) did not accept all of them.

2. The Manuscript is not written by the Guideline for Authors
(<http://www.sciencedomain.org/page/general-guideline-for-authors>).

Still, I think the Manuscript number Ms_AIR_34246 can be accepted and published in Advances in Research, but after revision. Please, find in attachment file my comments.
