PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>To limit the different elements of confusion, this questionnaire should be avoided because it already suggests the answer to the pregnant woman. But it has nevertheless permit to get some data that have been analyze with efficiency.</p> <p>The authors recognized that there are some limitations in this study and I agree with them.</p> <p>In addition, as the first pregnancy is recognized as a real risk factor of PIH, it should be better to separate the analysis of this item as an individual factor and not to put it together with the second parity.</p>	<p>The authors agree with the reviewer's submission and necessary amendment has been made in the article. Table 2 containing the questionnaire has been deleted from the article in order to avoid confusion as stated by the reviewer.</p> <p>With regards to this submission by the reviewer the authors will like to state that this issues is another limitation of this study and it has been so stated. the first and the second parity were not separated in the questionnaire. In future studies this shall be put into consideration</p>
