

**SDI Review Form 1.6**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_31791
Title of the Manuscript:	On general mathematical constraints applying to the kinetics of species discovery during progressive sampling and to the resulting expression of the Species Accumulation Curve
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	Line 278 <b>PROPORTION</b> is lacking the second <b>R</b> . Actually, I don't see a constraint here but a good mathematical backup.	Correction has been made
<b><u>Optional/General</u></b> comments	Very good paper, maybe too mathematical for most people, but great analysis. I would like to see if it nicely applies to the Neotropical bird community, where total counts will be closer to 200-300 species in most circumscribed places.
