Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I appreciate the authors have given feedback and revision to the original manuscript. But I am still confused the authors did not clearly state the research mode and the proposed hypotheses. Instead the authors used Figure 1 in data analysis to show their research model. I think it is not usual practice in writing an academic research paper. So I suggest the authors clearly provide a figure about the research model and the descriptions of the hypotheses in Section 2 Literature Review.	The proposed relationship has been integrated in the background and the hypothesis has been included in the literature review.
