PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1- The abstract should be simplified. So, the author should not comment on the abstract section.</p> <p>2- Matrices should be given in tabulation in section 5.2.</p> <p>3-In order to give the readers more information, we suggest the authors to cite the following references:</p> <p>a.Vakkas Uluçay, İrfan Deli, Memet Şahin (2016). Trapezoidal fuzzy multi-number and its application to multi-criteria decision-making problems. Neural Computing and Applications, 1-10., doi:10.1007/s00521-016-2760-3.</p> <p>b. In my view references a, b & c are not related to research problem solved in the paper, so the same are not included in the references.
