FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>From the comments I had submitted on the first version, some things have improved.</p> <p>The authors did some changes in Introduction but not adequate.</p> <p>The authors also added some discussion, but missing the real discussion connecting the parameters they measured (i.e. education level, innovations, attitude towards apple cultivation etc differences between the 3 altitudes.</p> <p>There are some minor mistakes in the data presented as they do not add to 100%.</p> <p>The English language still needs improvements, but is almost acceptable now.</p> <p>Again, the authors have added mean values and have not discussed them anywhere.</p>
