

Editor's Comment:

The research paper has been reviewed and the comments are given.

Manuscript No: **2017/AIR/38573**

Manuscript Title: The degradation the river Nakanbé banks (Burkina Faso) facing to climate change : a participatory approach for reforestation as a sustainable solution for water resources management.

The title is too lengthy can be made short as per good quality journal norms

The repetition of expression and thought at places

The flood quantity, the gauge, water gradient and water carriage capacity of the river if added, would have made the paper excellent. Some corrections are made needs incorporation if desired.

The work is excellent and fit for publication
