

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	<u>Advances in Research</u>
Manuscript Number:	Ms AIR_35629
Title of the Manuscript:	Rice: Grappling with Cold under Climatic Changes, Global Impact and Counter Strategies
Type of Article:	Review Paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The author made the suggested changes. References should be arranged according to pattern of the journal (lines 90 e 94, for example). Line 113 with two parentheses. However, there is still evidence of plagiarism (lines 215-225, for example).	References in line 90-94 have been arranged as per the pattern of journal and parentheses have been checked in line 113 and only one is maintained since it makes manuscript more cleat and informative. Plagiarism has been reduced to a minimum level in line 215-225 since those data are modified adoption from a bunch of literature.
