

**SDI Review Form 1.6**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_38786
Title of the Manuscript:	Vegetable Crops: Risks and losses faced by farmers
Type of the Article	Original research paper

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>Background of the study , whether similar studies have been conducted and on what parameters and results is not reflected in the paper,</b></p> <p><b>Literature review is not competitive,</b></p> <p><b>Method of sampling and target population is not visible</b></p> <p><b>Past date of losses is also not shown</b></p> <p><b>The amount of loss could have also been quoted</b></p> <p><b>Sound managerial implications to compensate or curb the losses is also not found</b></p> <p><b>Future scope of the research is also not given</b></p> <p><b>Beyond percentage there could have been more relationships developed by the author like statistically proved tests</b></p>	<p>Background of the study has been already given in the paper and i have not found the similar study.</p> <p>I have included the competitive literature.</p> <p>Simple random sampling technique is used and the sample population is the farmers of Haryana, India.</p> <p>Average past losses are described in the study as stated by the farmers individually on the basis of their own past experience.</p> <p>It is not possible for us.</p> <p>Managerial implications to compensate the losses are the coverage of all related risks in the agriculture insurance policies implemented by the government and risk management measures provided to the farmers, which has been suggested in the study.</p> <p>Future scope of the study has included.</p> <p>It is simply an empirical study which is conducted on and for the farmers.</p> <p>Ranks to different risks involved in particular vegetable crop are given by the farmers (such as highly worried, moderately worried and least worried). I think, it fulfils the objectives of my study very well. Thats why i used the simple frequency and percentage technique with the help of SPSS.</p>
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
