

Editor's decision:

Authors have in the title, in the abstract and in the methodology soybeans' and cotton. But in the results, cotton is missing.

Author's feedback:

Respected Editor, this paper includes the growth parameters of soybean, which was grown as intercrop in between cotton rows (2:1). Therefore the parameters pertaining to soybean growth parameters were provided in article. Though, cotton is intercropped but parameters of cotton were not included. In addition to that, combined effect of cotton + soybean wrt biomass and leaf area; economics were provided, which was the result of cotton and soybean.
