The recommended sample size for a given population size, level of confidence, and margin of error appears in the body of the table.

For example, the recommended sample size for a population of 1,000, a confidence level of 99%, and a margin of error (degree of accuracy) of 3.5% would be 575.

Change these values to select different levels of confidence.

Change these values to select different maximum margins of error.

Change these values to select different (e.g., more precise) population sizes.
