PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | <ol style="list-style-type: none"> Footnotes under the tables are unclear. Figures 1 to 11 are not necessary because they present the same data from tables 1 to 3. Since you studied the effects of vitamin E and panax ginseng, you should compare the effects of these 2 compounds in the discussion. Which one would you recommend and why based on your results? Did you give nicotine to the rats orally? If so, how much was nicotine absorbed to the blood circulation and with the amount you gave the rats could it be toxic enough? | <ol style="list-style-type: none"> Foot notes have been rewritten and made simpler and clearer All the figures have been removed. Only tables are left. These are equally very informative. A paragraph has been added to reflect this Administration was done orally using castor oil as the vehicle and it was based on previous research works which have been appropriately referenced and acknowledged. |
