**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>Introduction does not cite previous works that have been done by other researchers on no-till implements.</p> <p>The materials and methods section is not up to standard. No photos or illustrations etc. What approach or methods was used to evaluate the No till drill? Honestly, there is more required under this section than has been presented. What are the technical characteristics of the no-till implement? Everything looks too abstract.</p> <p>The results and discussion section is highly inconclusive. It is not surprising because the Materials and Methods section was not up to standard.</p> <p>What's the meaning of the Acronyms, RWMP, RAU etc.? If this work is an institutional report, that's fine. But it won't pass for an internationally acceptable article.</p> <p>It is unethical to not make reference to previous research on a study or cite appropriate literature. No experimental design, data analysis etc.</p> <p>Author should have a look at these articles: <a href="https://zenodo.org/record/168434/files/ankur%20singh%20bist.docx">https://zenodo.org/record/168434/files/ankur%20singh%20bist.docx</a> <a href="http://krishikosh.egranth.ac.in/bitstream/1/69489/1/T-83474.pdf">http://krishikosh.egranth.ac.in/bitstream/1/69489/1/T-83474.pdf</a></p>	<p>Previous work to be sited in introduction and result and discussion.</p> <p>All needful information becomes included in material and method.</p> <p>Result and discussion arranged as per need for research paper.</p> <p>All reference are sited.</p>
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
