

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_38839
Title of the Manuscript:	Influence of integrated nutrient management on nutrient uptake by cotton and soybean in intercropping system
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Though authors have mentioned "Corrections incorporated as per suggestion in Revised -ms-AIR_38839_v2", I didn't find much changes and clarification. This requires major revision. Authors are stating other's result without quoting them. Several statements in discussion part are still written vaguely. I am not sure if they know how the microbial degradation process is carried out by the microorganisms. Please see the attached file "1.Revised-ms_AIR_38839_v2" for details.
