**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	1). Lines 13 & 14 stated the aim of this study. How did you determine spawning frequency at different aquatic zones? It's not reflected anywhere in this article. This should be shown in the methodology and result accordingly.	
<b>Minor</b> REVISION comments	1). The statement in lines 21-23 is not related to this study, it's not part of the study nor a call for further study, it should be removed.  2) I don't think lines 54 - 55 are necessary.  3). How can you reconcile line 77; ' it attains a length of 31 cm' with lines 17- 19; 'it is a medium sized carp species and reported to have moderate growth rate compared to the major carps which attains a length of 31 cm. It's contradictory  4) Use at instead of @ in line 86.  5). The statement in lines 109-111 seems is irrelevant, because that was not addressed in this study. 6.Reference number 14 is repeated in 16, while references 8 and 12 is not in the text. <b>Plagiarism issues:</b> <a href="http://aquafind.com/articles/Puntius-sarana-sarana.php">http://aquafind.com/articles/Puntius-sarana-sarana.php</a> (Determine the level of plagiarism from the web link)
