FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>LINE 59: data from 2000 to 1993 To be written as "data from 1993 to 2000"</p> <p>LINE 70-73 The suggestion may be considered: Zang et al. (2012) used the same method after reducing two coefficients for 35 sites in China and obtained mean absolute percentage error and RMSE ranged from 16.22%, to 4.33% and from 1.88 to 1.10 MJ/m²day respectively.</p> <p>LINE 60-61, 73, 76, 77: Referencing style to be followed throughout. See examples: Janjai et al. (2009) Almorox et al. (2011)</p> <p>Generally the referencing style has not been followed (see editorial report or download a published article). Some of the errors would have been automatically corrected if author(s) had followed the editorial report. I suggest that any published article of journal should be downloaded and used by author(s) for correcting the referencing/ inline citations.</p>	<p>According to suggestions, corrections are made. All of references are edited.</p>
