PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	This MS deal with the determination of the essential vitamins of <i>Terminalia catappa</i> L. (Combretaceae) almonds cultivated in Côte d'Ivoire. The authors elucidated that <i>T. catappa</i> kernels are good source of water-soluble vitamins, suggesting the protection of avitaminosis in infant by the daily consumption of almonds. The MS contain the useful data for human health.	Thank so much for your comments summarizing the main goal and the conclusion of this research. Of course we passed through the manuscript for any typing and language errors in order to result in a good quality manuscript.
