PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The title should be changed as "Effects of Feeding Graded Levels of Balanites aegyptiaca Leaves as Supplement to Urea Treated Maize stover on the Some Performance of Red Sokoto Goats "Some " should be added.. performance is a general term. all parameters could have been evaluated If authors want to use just this word...	If "some" is added, "parameters or characteristics" would be added as well which will further lengthen the title. The major performance parameters (intakes and weight gains) were discussed. I think the title is okay. (My view though)
Minor REVISION comments		
Optional/General comments	Effective time of tetracycline (LA) is up to 72 hours but your study was completed in ten weeks. you can't eliminate all bacteria with this antibiotic because of individual situation just the opposite it can be harmful for ruminal flora microbiata. There was no need to use antibiotics.	Thank you for this insight. It will be considered and effected in the next experiment
