

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_36468
Title of the Manuscript:	Haematological parameters, Serum metabolites and Enzyme activities of Broiler chicken Fed With or Without Phytase
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, Correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Methodolgy in Abstract is not clear. Introduction: Purpose of study is not justified. Methodology: 'Experimental Birds' should be replaced with 'Experimental Animals' Results: are well mentioned and are interesting. Conclusion: is too general. Authors need to elaborate more.	The methodology under abstract was about the design of the experiment and the parameter investigated. There are no literatures on blood parameters in relation to phytase. I've elaborated on the conclusion in the original article.
<u>Minor</u> REVISION comments	Many of the references need to updated. Advise to include recent references.	There are no recent references on the effect of phytase in relation to haematology, serum metabolites and enzyme activities.
<u>Optional/General</u> comments	Manuscript is well written. Detailed research was carried out.
