

SDI Review Form 1.6

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_37677
Title of the Manuscript:	EFFECT OF POULTRY MANURE AND UREA ON SOIL CHEMICAL PROPERTIES, NODULATION AND YIELD OF GROUNDNUT (Arachis hypogaea) IN AKANU IBIAM FEDERAL POLYTECHNIC, UNWANA AFIKPO EBONYI STATE
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The conclusions should be reissued and mention the relationship of manure with urea, since in scientific terms a little is not significant. On the other hand, the nitrogen used for the production of peanuts is not found in the article, which is why the relationship is not understood in the conclusions.	The conclusion has been reframed to include the relationship between poultry manure and urea on soil fertility, production and nodulation of groundnut. Nitrogen used for peanut production in this study was not added as a single element; rather nitrogen sources including urea and poultry manure were used. Therefore the effects of these two nitrogen source materials as they affect peanut production have taken care of the relationship between nitrogen and peanut production.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
