

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_37677
Title of the Manuscript:	EFFECT OF POULTRY MANURE AND UREA ON SOIL CHEMICAL PROPERTIES, NODULATION AND YIELD OF GROUNDNUT (<i>Arachis hypogaea</i>) IN AKANU IBIAM FEDERAL POLYTECHNIC, UNWANA AFIKPO EBONYI STATE
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In general, the paper is OK, and I agree to process in the journal after little correction Just little correction: Line 112: STATISTICAL ANALYSES ...> STATISTICAL ANALYSIS Line 115: using FLSD 0.005.... FLSD 0.05?? In figure 1: the legenda of the figure seems not complete ... the green bar?? Line 271-272: in CONCLUSION ... the sentence "but also to enhance nodulation processes in groundnut for long lasting fertility effect in terms of nitrogen". This statement does not support with data, and also the experiment only once and no data on residual effect of the treatments. So that I suggest to delete these sentence	Line 112: Analyses has been changed to analysis. Line 115: The correct thing is F-LSD_(0.05) The legend has been completed. Line 271-272: The sentence has been deleted.
