

SDI Review Form 1.6

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_33787
Title of the Manuscript:	Efficiency of some fungicides on blast and blight of the rice leaves
Type of the Article	Original article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Developing a treatment program for the reduction of blast and blight fungal diseases in rice is a good research that will provide a guide to rice farmers in the area towards the reduction in the incidence and severity of the diseases and reduction of yield losses as well due to the disease infestation. However, the cost implication for the treatment program relative to the poor resource farmers income should be taken into consideration and the effect of these synthetic chemicals on the immediate environment and on non target organisms.	
<u>Minor</u> REVISION comments	Please all the comments inserted in the manuscript should be properly effected. The materials and methods should completely revised to give understanding to readers on the layout, design and statistical tools adopted for the study. The study location should be included probably with the coordinates (GPS readings) to add value to the manuscript.	
<u>Optional/General</u> comments
