SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the introductory paragraph ensure millet, rice and corn have their scientific names included the first time they appear. Editorial work throughout the document for example; (1637912 t) and not (2533999t). Section 3.1 Field data Expound what it means to have false testa Section 2.2.2 Agronomic yield test The third last sentence "weeding was done when needed" should be made more specific so that the study is repeatable.	
Minor REVISION comments	Section 2.2.1 Field screening The experiment was conducted during 1986-1987, 1987-1988, 1989-1990 and 1991-1992. Results have been displayed for only 1991-1992 and the others are missing. Analysis of variance table is also necessary to show the sources of variation. A brief description of the climatic and soil conditions during the experiment period.	
Optional/General comments	The paper is good and very informative. Correct text organization. For example list of references no. 22 put a fullstop (.) after 1982.
