

SDI Review Form 1.6

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_35439
Title of the Manuscript:	Graphical architecture of some production traits in F2 wheat populations
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This study is useful for understanding genetic inheritance of the yield related traits. The results could be used as reference. Unfortunately, only 30 plants from segregating populations F2 were measured for the concerned traits. This caused means of some traits in some crosses, such as plant height and days to heading in Iqb X G-98, spike length in Tat x Waf, Waf x Mar, Tak x G-98, Tak x K-wal, Iqb x Inq were lower than their lower parents.	
Minor REVISION comments	- References are needed to check carefully. Some are present in the text, but are not in the reference section. Some are present in the reference, but are not in the text. - P6, "Sangwan and Choudhry(1999)" should be "Sangwan and Chaudhry(1999). - English level should be improved.	
Optional/General comments	It is suggested to increase samples to at least 200 plants from each cross and then rewrite the manuscript.
