

SDI Review Form 1.6

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_39582
Title of the Manuscript:	Seasonal Dynamics and Damages of Mononychellus tanajoa Bondar (Acari: Tetranychidae) on Commercial Cassava Varieties in Mwanza Region, Lake Zone, Tanzania
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is original and the subject matter is interesting. However, you need to rephrase some parts. 1) Formatting is without pattern; 2) The pictures are very bad. The information is confusing, small. The author chose the wrong chart to present data on population fluctuation of mites and damage in different cultivars. In this case, you can not use a line. 3) Repeat in the text all the information in the tables. 4) describes the results very well but argues little. Basically, it merely mentions that environmental differences are responsible for the responses in the study. You need to explain how that happens. The discussion needs to be thorough. If rainfall influences, explain why. What changes in the environment? What is the influence on the physiology of the mite? Do not forget that the ecology of populations and the study of ecosystems is not limited to biotic and abiotic factors in isolation. Consider in your discussion the interaction between individuals and the environment.	
Minor REVISION comments	There are many suggestions in the PDF file.	
Optional/General comments
