

Editor's Comment:

After reviewing the final version of the revised paper titled " PHYSICOCHEMICAL PROPERTIES OF ALCHORNEA CORDIFOLIA, CYPERUS ESCULENTUM AND IRVINGIA GABONENSIS SEED OILS AND THEIR APPLICATIONS ". I found it not sufficient for publication in its present form.

Here are my comments:

Although the manuscript is well written,

1. The authors should provide enough literature reviews/ background information in the introduction.
2. At present, they only provided 14 References which I believe too few for a very known topic.
3. The introduction started with Reference 5 which is not proper. References should appear in chronological order and start with Reference 1.

Major Revision is needed for it to be published.
