

SDI Review Form 1.6

Journal Name:	Asian Journal of Applied Chemistry Research
Manuscript Number:	Ms_AJACR_42287
Title of the Manuscript:	PHYSICOCHEMICAL PROPERTIES OF ALCHORNEA CORDIFOLIA, CYPERUS ESCULENTUM AND IRVINGIA GABONENSIS SEED OILS AND THEIR APPLICATIONS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	Chemical analysis section well explained in the material method. But plants that are important in this study. The 3 plants used in the research belong to different families. The differences in the research are already expected. It is not original in this respect. For each family 3-4 different plant samples can be taken, 3 different samples could be prepared by calculating the average. More information about botanical features of plants can be given. I did not see Akubugwo and Ugborg in the literature.	Akubugwo and Ugborgu (2007) is represented by citation"[1]" in the Introduction. I think the botanical information necessary in this study is the names of the plants for their identification, and that has been given.
