PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The author uses number to identify his references in the body of the manuscript, but the references section is not numbered, it is not clear if the references are arranged according to the numbers in the body of the manuscript. The author should be consistent. Either use number in the manuscript and then in the also use number in the reference section or use name in the manuscript and also write the manuscript as it is.	The References were numbered in the first manuscript submitted according to the order in which they were cited in the body of the manuscript. Besides, no other reviewer has commented on that contrarily. However, I shall correct it accordingly if it is truly so.
