

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Applied Chemistry Research
Manuscript Number:	Ms_AJACR_43339
Title of the Manuscript:	Development of stability indicating and robust Rp-HPLC method for determination of Teneligliptin
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>1. Re structure the summary table. Like mention the % RSD of system suitability conditions individually. Mention the linear range and correlation coefficient. For precision %RSD value mention the value of "n".</p> <p>2. Avoid repeated mentioning of sample preparation.</p> <p>3. Mention the full notation of abbreviations used in text.</p>	<p>New Sst table has been included Table 3a, Linearity range mentioned in the text at appropriate place, Precision n value shown in Table</p> <p>Sample preparation for normal assay and force degradation studies are give separately hence it looks like repetition.</p> <p>All possible abbreviations are mentioned as full notations</p>
