SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Title: The title of the paper is good but I would like to suggest the title to be re-structured in this manner. <i>Effects of goat rearing on the livelihood of women Igabi, Chikun , and Kajura local government area of Kaduna state, Nigeria.</i> Abstract: Insert one objective of your study in the abstract. Why was the study conducted? I refer you to line 196-198 where it is clearly stated and has to be part of the abstract. Make conclusion to your study as you did for recommendation. For Example in conclusion the study showed that the perceived effects of goat rearing on the level of living of the women in the study area were positive based on increase in savings, income, household food security and household assets reported by a large majority of the respondents. [This paragraph should come as second but last paragraph before recommendation. What was the level of savings, increase income, household food security and household assets in terms of % should be inserted in the abstract rather than putting more emphasis on adoption rate. Savings, income, food security and assets are sound indicators that should be clearly captured in abstract.	

SDI Review Form 1.6

	Keywords: Your keywords should be the true picture of your title and should be one word. Remove awareness of management practices, adoption of management practices and include women, socio-economic factors, Institutional factors, Nigeria, Keywords should at least be five words. I refer you to the journal format? Methodology: Line 55 and 56 you have two different sampling methods that is purposively and random sampling and your farmer selection should be based on purposively or you maintain random sampling. Results and Discussion- It is well written and articulated, however for subsequent research work each variable should be treated as table separately for more understanding and readability. References: Please cross check your references once again. I have not seen Devendra (199) can you cross check in the text.
