SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Proposed research article is a very good step towards implementation of sustainable agricultural practices as it describes the farmers interest in using the biofertilizer. Such study will certainly promote and will provide sufficient information to government organization for properly promoting the farmers for using biofertilizers. I recommend the article for publication in the journal after incorporating few suggestions.	
<u>Minor</u> REVISION comments	1. It is an extensive study of the authors and can be, in my opinion, regarded as research article rather than review article. 2. azolla is an organism and can be written as 'Azolla sp' 3. abstract section can be written in past tense. 4. Introduction section – Most of the sentence is starting with According to..... These sentences need to be rearranged. 5. Also, significance of Azolla in agriculture can be discussed in introduction section.	
<u>Optional/General</u> comments	It may be published after incorporating above sentences.
