SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	No ethical issues are found in this manuscript	
<u>Minor</u> REVISION comments	Since the article is about socioeconomic characteristics of the farmers and employs descriptive statistics, it is vital to use the right sampling procedure to ensure that the sample farmers represent the population. It is not clear how or what criteria were used by the author to choose 322 sample farmers among the approximately 600 villagers. There should be explanations about this, Spelling mistake: line 159 ("more than" rather than "more that"). In the conclusion in the abstract: "farming" should be used rather than "faring."	
<u>Optional/General</u> comments	For the household income, it may be better to put a formula of income analysis in "data collection and analysis" section. For example: I (income) = R (revenue) – TC (Total Cost). $TC = VC$ (variable cost) + FC (Fixed Cost). $R = P$ (price) $\times Q$ (quantity of production). HI (household income) = income from betel leaf farming + income from others (other farming and businesses).
