SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In abstract, what do you mean by yar? It should be year Neither in the abstract nor in the instruction the objective of the work stated. In Methodology, the data collected and statistical analysis used should be stated. It is missing. In line 205, cultivated crops will be preferable to intervened crops. In line 244, what is the life cycle of the proposed short duration varieties when compared to the varieties farmers were growing before this project? Still in line 244, are sure that quality of a variety is determined by its short life cycle? Long duration varieties can be of high quality. In line 292, did you provide hybrids to the farmers? If yes, would the farmers able to buy or afford hybrids every planting season? Would the project continue to provide them with hybrids for the sustainability of the project? In line 302 and 303, why you did not include those people in your methodology?	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
