

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	Ms_AJAEES_26235
Title of the Manuscript:	Socioeconomic Determinants of Rice Production among Small-scale Farmers in the Shama-Ahanta East District of Ghana
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Author(s) have effected necessary changes (use of Tobit regression) has been applied and produced good results than before. Use of environmental factors could benefit further the paper, the limitation noted by author(s) is accepted – in future, similar studies should make effort to uncover the role of environment related variables. 1. Author(s) need to include the model specification (eqn 2 as in the original paper) 2. Indicate the dependent variable y^* as a latent variable 3. Output variable is significant (t=14.6) but in the current version it is indicated as insignificant, Author(s) need to correctly mark this. 4. Land access variable (only 6% access land)? Should indicate in the paper whether farmers are renting. Not clear how land is accessed in Ghana
