FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The author still does not appear to understand and/or appreciate my points. In order for the paper to be acceptable, in my opinion, it is necessary for the author to do the following. (1) explain clearly the economic (not the econometric) model of decision making at the basis of the test. (2) Specify the signs expected, on the basis of the economic model prediction or other considerations on the coefficients on each variable used. (3) Substitute the words "invalidate" and "reject" with "not agree with", in every instance in which the author's results appear to be different from those of a an earlier study.
