PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Although SWOT ANALYSIS has been included in the revised title, no SWOT analysis is included in the text. 2. If author wishes to retain SWOT ANALYSIS in title, let its summary be incorporated as small paragraph as part of conclusion, before recommendations on the way forward are made (i.e. strengths, weaknesses, opportunities, threats) within the Swaziland extension service. 3. All web citations must include date of access, at least month and year. 4. If author chooses to delete SWOT from title and maintain paper in the original title, I would not be comfortable to recommend it for publication. 5. Based on 1, 2 3 and 4 above, accept with a proviso that this is a Discussion Paper; and you do not need to refer it back to me.
