| <ol style="list-style-type: none"> <li>1. As abstract mentioned, the main objective of the paper was to detect spatial change of the village regarding conversion of agricultural land into housing. Results of the research is general exploration of phenomena of reduction of agricultural land area, which also occur everywhere. Because the research has not found the problems roots, the conclusion and suggestion are also very common.</li> <li>2. Architectural research would be beneficial if the local wisdom of rural architecture were explored. For example, some rural places using elevated houses compared with landed houses to minimize building coverage ratio. Ground floor can be used as multi-function as a storage farming equipment, home agro-industry processing, etc. Innovative ideas regarding livable and sustainable of rural planning and architecture design are very needed facing the agricultural land conversion process. On the other hand, innovative ideas of farming intensification such as urban farming system is also needed to minimize the decreasing farming production.</li> <li>3. Abstract: methods of study was too long, while the results are too short. Results needed to be elaborated.</li> <li>4. Introduction. Faddan should be converted to international unit, like ha, etc. Reference writing should be adjusted to instruction to authors. Exp. Knox and Marston, 2007,p.13, p.13 should be omitted, LU should be Lu <i>et al.</i>, 2004, page 2, paragraph 3 (there are different ..... ) should be included in Methodology, the same with the study area (page 3). Page 4: the total population of the village was expected to be around 15 000 in 2015 (this is not expected), In this paper there is no discussion. I think that all research paper must has discussion section, In SDI journal, I think that all references have to be numbered, and the number is put in body text of journal to replace authors' name). Abbreviation of journal name should be adjusted to Instruction to Authors.</li> </ol> |                                                 |
