1. Abstract : bolded subheadings i.e. aim, methodology etc. are not needed; place and duration of study are mostly repetition of the aims, therefore it should be erased. Abstract should not subdivided into some paragraph. I think the number of word in abstract has a limitation, please refer to instruction to author. 2. Table2. It is better if residential area use one unit only (acre). Why the value of the increase of residential area is too different with average of annual increase in residential area ?. It is better if the author presents the data about decrease in agricultural area. 3. Why author uses many figures ?. Is one figure (Fig. 8) not enough ?. Use of many figures need many pages. 4.
