SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. Abstract is a singled paragraph section, therefore no need dividing it into sections such as Aim, Methods and etc. 2. Under introduction section some statements/paragraphs are repeated, authors need to revisit the section. See the coloured part in the manuscript. METHODOLOGY: 1. The linear regression model selected is not proper in the adoption studies. This is because decision of farmers to adopt or not is a categorical variable which is not fit for continuous model like linear regression. I suggest authors to opt categorical models like Logit and Probit models. 2. Also the selection of sugarcane farmers as a sample frame needs more explanations to why not Bambara nut farmers. NB: Many comments can be seen on the manuscript, just click the highlighted part.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The paper is good with results capturing the Title
