SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	See track change notes; I often found that explanations were shortened to what appeared to be an “industry familiar” type of short form; the authors need to remember the audience and explain ideas fully so their work is easily accessible. It needs some work for clarity but it seems to address the stated purpose quite effectively.	Thank you for your valuable comments. We modified our article according to your suggestion basically. For comment A15, we added some additional explanation, see line 128-131. For comment A25, we added a source to support it, see line 232-233. For comment A31, we followed the format of your journal. So in case of table, it is above, and in case of figure, it is below. For comment A33, we tried to simplify the sentence and added footnote, see line 284-286. For comment A42, what we want to say is “farmers able to trust a small number of people are relatively poor”. We modified related sentence, see line 348-354. For comment A43, we modified the sentence, see line 361-364. For comment A45, we modified our sentence, see line 368-373.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
