SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1. Abstract should be include Aim (Background), Materials and methods, Results, Conclusion. 2. Author should estimates socio-economic constraints for the accessibility of credit with multiple regression model. 3. Author should be considering a model that socio-economic factors of small farmers like age, education, farm size, income affecting on access to credit. 4. Author should apply a model otherwise this manuscript is very simple and there is any novelty in this research work.	1. This has been substantially complied with 2. I don't understand what you meant by "author should estimates socioeconomic constraint for accessibility of credit with regression model". This does not fall within my focus. However, I have made efforts to establish the socioeconomic factors influencing access to credit using logit regression as it is the most appropriate given the fact that access to credit was operationalised as a dichotomous variable. Multiple
